Mercruiser Engine Temperature Sender Location

Re: 5.0 GXi-G temp sender location Temp sender solved! The reason I couldn't find a traditional screw in type temp sender is this engine (2007 5.0GXi-G) does not have one!!! It is sensed by the ECM and transmitted to the gage. The ECM was faulty, had to be replaced, \$2100, but thankfully it was under warranty.

5.0 GXi-G temp sender location | Boating Forum - Iboats ...

my 7.4 efi mercruiser will not come up to temp, the guage stays on bottom. if u run the engine for a while and shut it off then turn the key on with the engine not running the guage will come to temp but when u start the engine it imediately cools back down. I have already changed the thermostat and sending unit. Gauge checked and works fine.

My 7.4 efi mercruiser will not come up to temp, the guage ...

If it's a 5.7 Mercruiser 260 that's a GM 350CI based engine. The problem may be finding an automotive one rated at 160 as most are 195 for that era GM small blocks. Here is the Sierra kit number: Sierra International 18-3648 Thermostat Kit.

3 L Mercruiser Engine Temp Sender Location 1985

Therefore, for a full fresh water cooling system (including the engine heat load as well as the exhaust system) the general temperature rise for the raw water will be approximately 50 degrees F. This means that if you were operating in 80 degree F water conditions, the water temperature exiting the heat exchanger and entering the exhaust risers should be in the range of 130 degrees F.

Marine Closed Cooling Systems Tips & Temperature Problem ...

The temperature sending unit, more properly known as a temperature sensor, is one of the most important sensors in your car. It is the sensor that tells the computer when the engine has warmed up sufficiently for the computer to pay attention to the many other sensors on the engine and exhaust.

How to Test a Temperature Sending Unit | It Still Runs

Re: Normal Operating Temperature for a 3.0 liter Mercruiser? Normal operating temperature should be between 140 and 170 degrees. And it should be at that at all times. I agree with bond-o that you should look into replacing the impeller and also the thermostat. But running at 175 will not hurt anything.
